

# Essay “My Experience”

My very best experience is being a leader of some organization; it's AXIPALA (Arek Smaxi Pecinta Alam). This organization had built my sense of leadership well. So, I know how to lead people, at least, I can lead myself for the time being.

Of course, not only talk about leading, but it also tends to the experience of managing time as well, so we won't pass any moment at all. This experience is really worthy to me. The other point I could get is having the capability to undertake any possible things happened while we're leading some organization, this also analogue to the hard time we'll pass. The power to be sure that we can handle anything up is the best result of being such a leader.

According to my own Leadership period for a year (2006 -2007) many things happened. The most unforgettable moment is when I just became a leader, my crews wanted to drop me down. I just couldn't understand why they did so. They seem didn't want to help me at all during the period. All the duty of their job had been abandoned. So, believe it or not, I had to make all the things settled up properly.

Of course it hard for me to do such the things, but, thanked to Allah to answer my prayer and send me some saviors. My seniors are humbly helped me for the difficulties I had.

The jealousy between one another in an organization is just a very ordinary thing. So, we just have to handle it by 'trust to ourselves' and let them go on their way. The Principle I had is quite worthy to pass the time at the moment.

Since then, Alhamdulillah, I had finished my job to be a not really good Leader, but of course, I had done my best, many things I had sacrificed during my period. I ever got a bad mark for the exam just because I didn't have time to study at all. I was really busy to make everything settled as well. I ever got my money running out before the next month came up. I always let everything come and pass me by; I had no time to concern unless it's about Axipala.

All my thought is because "I'm the Leader, and I'm the first person who'll get the punishment or get the compliment to the others"

So, I have to work up properly and never thought of having such a nightmare like that. I just passed it normally just like my other way of life.

The only differences is, in my own way, I can make my own decision and get a hold to the thing I'd done. But, became a Leader, we are not allowed to make anything just based to our opinion, but, we have to think of our member as well.

That's what I called by "A Wise experience of Axipala to Me"

The experience, of course, makes me become a powerful, confident, and a hard work person ever.

# Essay “MY MOTIVATION”

Speaking about motivation and my dream, they're quite much.

When I was child, I always have a dream to be a doctor. But, time to time passed me by, and, finally, I just discovered what my capability is. It's speaking and making relationship to the others.

That's why, at this moment, I totally change my dream and destroy the believing to be such a doctor. I just can have a very best mark for science and the opposites for my languages mark, they're all good, and at least, I never get 6 for each of them (English, Bahasa and Deutch).

I do concern to the Languages subjects I have. I really love to speak much in any languages, especially English, and I'm very glad when my friends ask me to have a chat in that kind of languages. All I want to do for my future is study in a good University which can build my talents as well. So that, I can work to the job field I enjoy much, as examples become an ambassador, a human resources staff, lecturer or guide. A job which let me meet many people every day and of course elaborating my skill of speaks many languages.

That's why I prefer to choose Communication Comprehension than the others.

My friends gave me Information about a university which had opened its Scholarship program. I just so delighted and tried to find out the University she'd referred to me.

Finally I found Paramadina University – the University she told about - had opened Scholarship called “Paramadina Fellowship 2008” I think, it's a great chance for me to join into it. I can study in a good University free plus receive the living allowance provided by the program.

At least, I can make my parents proudly realize that I can join the Scholarship program and have no duty to pay 'till I'd have graduated from the University. And, the most proud feeling is I can get received because of my own ability.

This'd be a really amazing experience I could have!

Besides that, I have discovered that the Paramadina University doesn't just teach the subjects we need, but also based on Islamic Fundamental.

That's what I love so much. Many Universities just show off their capability in the development of technology and Science but have no real concern to the religious aspect. Won't the student be such an empty jar of knowledge without even seriously undertaking their own Faith?

According to the fundamental of Paramadina ; Prof.Dr.Nurcholish Madjid is also a very well known person with his humbleness and cleverness also make me sure that I really want to join into the University.

Besides the visions and missions I had read on the site that Paramadina initiate the students to have Islamic entrepreneurship soul so –according to that- I just have no worry if I couldn't get received into Government, even Private Corporation because the University provides a skill which we'll be transfer to the students about entrepreneurship as well. So, we won't lose any job because we can make it up.

That's great towards facing the global era which will be passed in the future. No more dependency, I can be a very independent person and make my own business. That's what my reason of studying –especially- the Communication comprehension in Paramadina University.
